

ral::cache::CacheData

```
classDiagram
    class CacheDataLocalFile["ral::cache::CacheDataLocalFile"]
    class CacheData["ral::cache::CacheData"]
    CacheDataLocalFile --|> CacheData
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded box labeled 'ral::cache::CacheDataLocalFile'. A blue arrow points vertically upwards from this box to a white box labeled 'ral::cache::CacheData' at the top. This represents that 'CacheDataLocalFile' inherits from 'CacheData'.
